## Correction: Shear-induced polydomain structures of nematic lyotropic chromonic liquid crystal disodium cromoglycate

Hend Baza,<sup>ab</sup> Taras Turiv,<sup>bc</sup> Bing-Xiang Li,<sup>bc</sup> Ruipeng Li,<sup>d</sup> Benjamin M. Yavitt,<sup>de</sup> Masafumi Fukuto<sup>d</sup> and Oleg D. Lavrentovich<sup>\*abc</sup>

Correction for 'Shear-induced polydomain structures of nematic lyotropic chromonic liquid crystal disodium cromoglycate' by Hend Baza *et al.*, *Soft Matter*, 2020, **16**, 8565–8576.

The authors regret an error in Fig. 13 in the original article. The figure misplaced the expressions for viscous torques. In the correct version, part (a) should read  $\Gamma_{\text{visc}} > 0$  and part (b) should read  $\Gamma_{\text{visc}} < 0$ , as shown below.

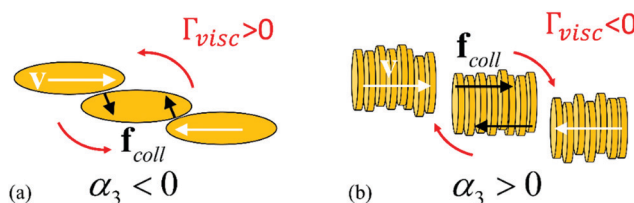

Fig. 13 Scheme explaining  $\alpha_3 < 0$  in regular low-molecular nematics and  $\alpha_3 > 0$  for LCLCs formed by cylindrical aggregates.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
