Correction: Tunable deep-blue luminescence from ball-milled chlorine-rich $\text{Cs}_x(\text{NH}_4)_{1-x}\text{PbCl}_2\text{Br}$ nanocrystals by ammonium modulation

Hongfei Xiao,^{a,b} Hao Xiong,^b Ping Li,^b Linqin Jiang,^{*b} Aijun Yang,^c Lingyan Lin,^b Zhenjing Kang,^b Qiong Yan^{ab} and Yu Qiu^{*b}

Correction for 'Tunable deep-blue luminescence from ball-milled chlorine-rich $\text{Cs}_x(\text{NH}_4)_{1-x}\text{PbCl}_2\text{Br}$ nanocrystals by ammonium modulation' by Hongfei Xiao et al., *Chem. Commun.*, 2022, **58**, 3827–3830, DOI: 10.1039/D1CC07125D.

The authors regret that there was an error in Fig. 4 in the original article. The inset in the lower right of Fig. 4(c) was incorrect. The corrected version of Fig. 4 is presented here.

Fig. 4 (a) Optical photographs of $\text{Cs}_x(\text{NH}_4)_{1-x}\text{PbCl}_2\text{Br}$ ($x = 1, 0.7, 0.5, 0.3, 0$) NC solutions without (left)/with (right) 365 nm UV irradiation and their (b) normalized PL spectra, (c) CIE chromaticity diagram, (d) PLQY, (e) UV-visible absorption spectra and (f) time-resolved PL decays.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
