Correction for ‘Polycyclic motif engineering in cyanostilbene-based donors towards highly efficient modifiable emission properties in two-component systems’ by Arshad Khan *et al.*, *CrystEngComm*, 2021, 23, 8462–8470.

The authors regret that the emission shifts (**Ia**: 554 nm, **Ib**: 620 nm, **Ic**: 650 nm) reported on page 8467 under the section “Solid-state luminescence behavior” are incorrect and should be revised to: (**Ia**: 554 nm, **Ib**: 650 nm, **Ic**: 620 nm).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
