Correction: The structuring effect of the alkyl domains on the polar network of ionic liquid mixtures: a molecular dynamics study

Valerio Mazzilli,^{ab} Yanting Wang^{cd} and Giacomo Saielli^{*ab}

Correction for 'The structuring effect of the alkyl domains on the polar network of ionic liquid mixtures: a molecular dynamics study' by Valerio Mazzilli *et al.*, *Phys. Chem. Chem. Phys.*, 2022, 24, 18783–18792, <https://doi.org/10.1039/D2CP02786K>.

The authors would like to correct an error in the chemical structure in Fig. 1 of the published article. The correct figure is shown below.

Fig. 1 Structural formula of (top) 1-dodecyl-3-methylimidazolium, [C₁₂C₁im] or C₁₂ in this work; (bottom left) 1,3-dimethylimidazolium, [C₁C₁im] or C₁ in this work; (bottom right) bis(trifluoromethanesulfonyl)imide, [Tf₂N]. The methylene and methyl groups of the alkyl chain of [C₁₂C₁im] from C₄' to the terminal methyl C₁₂' bear no total charge.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
