# Correction: Synthesis of porous Fe<sub>3</sub>O<sub>4</sub> hollow microspheres/graphene oxide composite for Cr(vi) removal

Mancheng Liu,<sup>a</sup> Tao Wen,<sup>a,b</sup> Xilin Wu,<sup>b</sup> Changlun Chen,<sup>\*a</sup> Jun Hu,<sup>a</sup> Jie Li<sup>a</sup> and Xiangke Wang<sup>a</sup>

Correction for 'Synthesis of porous Fe<sub>3</sub>O<sub>4</sub> hollow microspheres/graphene oxide composite for Cr(vi) removal' by Mancheng Liu et al., *Dalton Trans.*, 2013, **42**, 14710–14717, <https://doi.org/10.1039/C3DT50955A>.

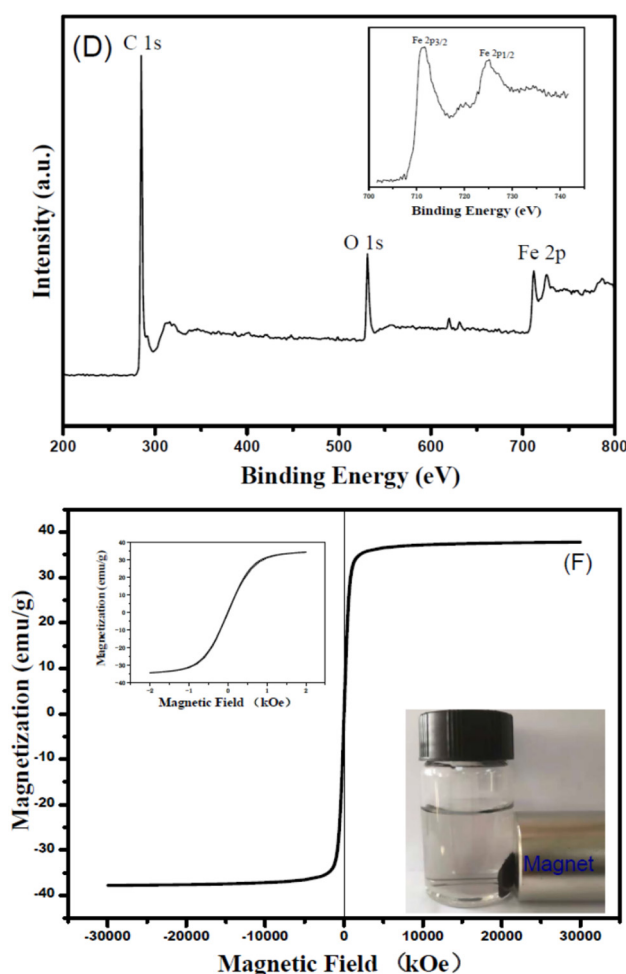

Fig. 2 XPS wide spectrum of Fe<sub>3</sub>O<sub>4</sub>/GO, and the inset is the Fe 2p spectrum of Fe<sub>3</sub>O<sub>4</sub>/GO (D), and the magnetization curve of Fe<sub>3</sub>O<sub>4</sub>/GO, the bottom inset is the magnetic separation of Fe<sub>3</sub>O<sub>4</sub>/GO (F).

The authors regret errors in Fig. 2D and F of the original article. After checking the original data files, the authors suspect that the data in the original Fig. 2D and F may be for another sample. Therefore, in order to protect the integrity and accuracy of the data in this paper, the authors have repeated the XPS measurement of porous  $\text{Fe}_3\text{O}_4$  hollow microspheres/graphene oxide. A corrected version of Fig. 2D is provided herein. In addition, the magnetization hysteresis loop of  $\text{Fe}_3\text{O}_4/\text{GO}$  and optical image have also been corrected below. The authors confirm that this correction does not affect the discussion and conclusions of the original article.

The authors would like to apologize for any inconvenience caused.

An independent expert reviewed the raw data provided by the authors and concluded that it was consistent with the corrected figures and does not change the discussion or conclusions presented in the article.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
