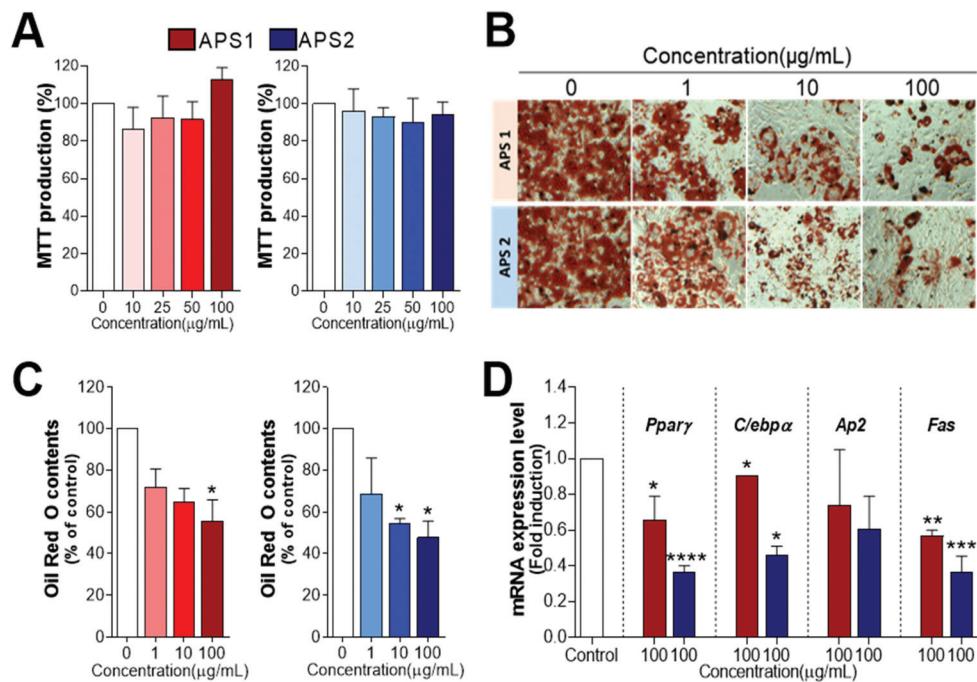

Fig. 7 Antidiadipogenic effects of APS and its potential mechanisms in 3T3-L1 cells. Panel A. Effect of APS1 and APS2 on cell viability in 3T3-L1 cells, panel B and C. Antidiadipogenic effects of APS1 and APS2 by measuring Oil Red O (ORO) staining of intracellular lipid accumulation in 3T3-L1 cells. Panel D. Regulation of adipogenic-specific genes expression by APS1 and APS2 ($100 \mu\text{g mL}^{-1}$) in 3T3-L1 cells. All values (mean \pm SEM) were obtained from three independent experiments. Asterisks indicate significant differences from the control (one-way ANOVA, * $P < 0.05$, ** $P < 0.01$, *** $P < 0.001$, **** $P < 0.0001$).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
