We would like to take this opportunity to thank all of *Nanoscale Advances*' reviewers, and in particular highlight the Outstanding Reviewers for the journal in 2021. Selected by the editorial team and Editorial Board for their significant contribution to *Nanoscale Advances*, we announce our Outstanding Reviewers annually and each receives a certificate to give recognition for their contribution.

In recognition of the varied contributions of our reviewer community, our Outstanding Reviewers from 2021 have been chosen based on several different measures, including the number, timeliness and quality of the reports completed over the last 12 months. In addition to reviewers who provided a high number of quality reports, we are pleased to highlight reviewers who provided exceptionally thorough and detailed reports, reviewers who provided clear and insightful adjudicative reports and reviewers who made additional efforts to aid authors in improving their manuscripts.

“By now it is a good old tradition that *Nanoscale Advances* recognizes the Outstanding Reviewers. Key in terms of

guaranteeing the quality and impact of *Nanoscale Advances* is the peer review process. As such, peer review depends not only on the excellence of the reviews but also on their timeliness. All of it comes on top of the many burdens that we face as active researchers. At the heart of the peer review process are carefully drafted reviews. They provide the valuable service that we owe to the scientific community in general, and to the readers of *Nanoscale Advances* in particular. I want to extend a big thank you to these Outstanding Reviewers and everyone else who has reviewed manuscripts for *Nanoscale Advances*.” – Professor Dirk Guldi, Editor-in-Chief

Dr Zibin Chen
The Hong Kong Polytechnic University
