[rsc.li/rsc-advances](http://rsc.li/rsc-advances)**Correction: Dimers of pyrrolo-annelated indenofluorene-extended tetrathiafulvalenes – large multiredox systems**Line Broløs and Mogens Brøndsted Nielsen  \*Correction for 'Dimers of pyrrolo-annelated indenofluorene-extended tetrathiafulvalenes – large multiredox systems' by Line Broløs *et al.*, *RSC Adv.*, 2020, **10**, 15030–15033, DOI: 10.1039/D0RA02787A.

The authors regret that the yield of dimer 3 was incorrectly reported as 23% in the original article. The correct yield is 58%. To reflect this, the following changes are needed.

The final sentence on the 2<sup>nd</sup> page of the article should read "For the corresponding reaction with 1,3-diiodo-benzene smooth formation of the dimer 3 was observed, and this product was isolated in 58% after 16 hours, while no mono-arylated intermediate could be isolated."

The yield should be updated on Scheme 2:

Scheme 2

The ESI document has also been updated accordingly.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
