Correction for 'Thermally stable mesoporous tetragonal zirconia through surfactant-controlled synthesis and Si-stabilization' by Ken L. Abel *et al.*, *RSC Adv.*, 2022, **12**, 16875–16885, https://doi.org/10.1039/d2ra01459a.

The authors regret that an incorrect version of Table 2 was included in the original article. The correct version of Table 2 is presented below.

Table 2 Weight fraction of t-ZrO₂ ($\omega_{\text{t-ZrO}_2}$) and mean crystallite size (d_c) for zirconia samples calcined at 973 K with different mole fractions of Si (yS), prepared in the presence of 20 mol% DDA during gelation (-20D). Values and error ranges calculated from Rietveld refinement. For detailed information, see section S3.1 in the ESI

Sample	$\omega_{ ext{t-ZrO}_2}$ /wt%	d _c /nm
0SZ-20D	4.98(4)	25.03(12)
5SZ-20D	38.08(11)	14.6(2)
10SZ-20D	100	11.87(14)
15SZ-20D	100	8.64(10)
29SZ-20D	100	8.10(12)
40SZ-20D	n.a. ^a	n.a.a
^a Not applicable.		

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
