## Correction: Biofunctional Janus particles promote phagocytosis of tumor cells by macrophages

Ya-Ru Zhang,<sup>a</sup> Jia-Qi Luo,<sup>b</sup> Jia-Xian Li,<sup>a</sup> Qiu-Yue Huang,<sup>a</sup> Xiao-Xiao Shi,<sup>a</sup> Yong-Cong Huang,<sup>b</sup> Kam W. Leong,<sup>bf</sup> Wei-ling He<sup>\*d</sup> and Jin-Zhi Du<sup>\*ace</sup>Correction for 'Biofunctional Janus particles promote phagocytosis of tumor cells by macrophages' by Ya-Ru Zhang *et al.*, *Chem. Sci.*, 2020, 11, 5323–5327, <https://doi.org/10.1039/D0SC01146K>.

The authors regret an error in Fig. 4a, where two of the panels contain partial overlap.

The panels for 2 h SPA3 and 2 h Tf + aSIRP $\alpha$  + SPA3 contain overlap, as the wrong data was initially used for 2 h SPA3. An independent expert has viewed the new data and has concluded that it is consistent with the discussions and conclusions presented.

The correct Fig. 4 is shown below.

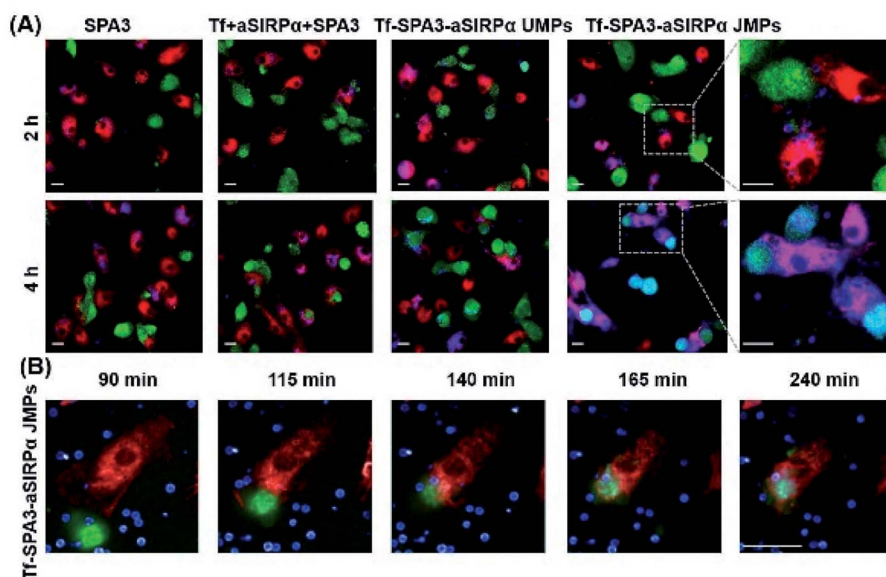

Fig. 4 Tf-SPA3-aSIRP $\alpha$  JMPs promote the interaction and subsequent phagocytosis of B16F10 cells by BMDMs. (A) Representative confocal images of phagocytosis assays treated with different formulations for 2 or 4 h, respectively. (B) Time-dependent of phagocytosis treated with Tf-SPA3-aSIRP $\alpha$  JMPs. In (A) and (B), B16F10 cells were labelled with CFSE (green), BMDMs were labelled with eFluor 670 (red) and particles were labelled with RB (blue). Scale bar: 20  $\mu$ m.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
