Correction: Luminescent columnar discotics as highly efficient emitters in pure deep-blue OLEDs with an external quantum efficiency of 4.7%

Joydip De,^a Ishan Sarkar,^a Rohit Ashok Kumar Yadav,^b Indu Bala,^a Santosh Prasad Gupta,^c Iram Siddiqui,^b Jwo-Huei Jou^b and Santanu Kumar Pal*^a

Correction for 'Luminescent columnar discotics as highly efficient emitters in pure deep-blue OLEDs with an external quantum efficiency of 4.7%' by Joydip De *et al.*, *Soft Matter*, 2022, DOI: 10.1039/d1sm01558c.

The authors regret an error in Fig. 2c of the original article where the X-axis label should be " q (\AA^{-1})" instead of " q (\AA)". The full and correct Fig. 2 is as shown below.

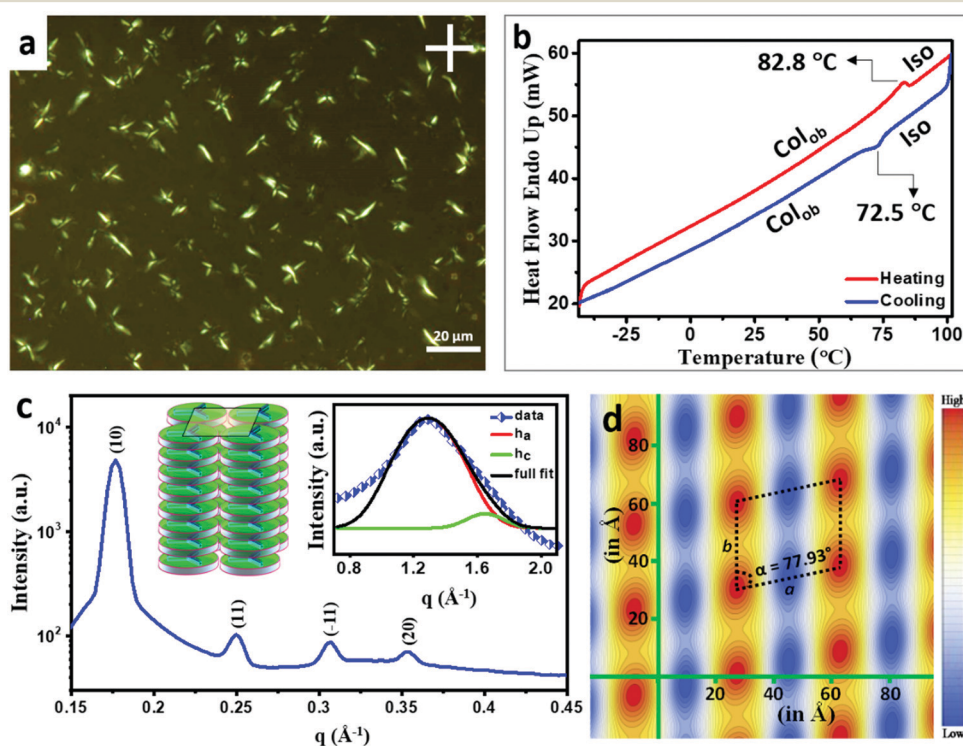

Fig. 2 (a) Polarising optical micrograph of compound **1.2** at 25 °C, on cooling from isotropic phase, under crossed polarizers. (b) DSC thermogram of compound **1.2** at a rate of 10 °C min⁻¹. (c) Small and wide angle (inset, right) X-ray diffraction patterns at 25 °C and (d) EDM of compound **1.2** in its corresponding Col_{db} mesophase.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
