Correction for 'Controlling CO<sub>2</sub> hydrogenation selectivity by Rh-based catalysts with different crystalline phases of TiO<sub>2</sub>' by Fenghai Cao *et al.*, *Chem. Commun.*, 2022, **58**, 4219–4222, <https://doi.org/10.1039/D2CC00472K>.

The authors regret that the following errors appeared in the original article:

Page 4219, abstract: "Hence, 1%Rh/p, 1%Rh/r, and 1%Rh/a exhibited methane, CO, and methanol selectivity, respectively." should be replaced by "Hence, 1%Rh/p, 1%Rh/r, and 1%Rh/a exhibited methane, methanol, and CO selectivity, respectively."

Page 4219: eqn (1) should read

Page 4221, second paragraph, line 2, right column: "The peaks at about 2060 and 1855 cm<sup>-1</sup> were attributed to the combined effect of bridging adsorption CO ((Rh<sup>0</sup>)<sub>2</sub>-CO) and linear-bonded CO (Rh<sup>0</sup>-CO) on Rh<sup>0</sup>." should be replaced by "The peaks at about 2060 and 1855 cm<sup>-1</sup> were attributed to the combined effect of linear-bonded CO (Rh<sup>0</sup>-CO) and bridging adsorption CO ((Rh<sup>0</sup>)<sub>2</sub>-CO) on Rh<sup>0</sup>."

Page 4222, third paragraph, line 3, left column: "Interestingly, the primary products of the 1%Rh/p, 1%Rh/r, and 1%Rh/a catalysts are quite different: CO, methane, and methanol, respectively." should be replaced by "Interestingly, the primary products of the 1%Rh/p, 1%Rh/r, and 1%Rh/a catalysts are quite different: methane, methanol, and CO, respectively."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
