## Correction: Photoelectron angular distributions as sensitive probes of surfactant layer structure at the liquid–vapor interface

Rémi Dupuy,<sup>a</sup> Jakob Filser,<sup>b</sup> Clemens Richter,<sup>a</sup> Robert Seidel,<sup>c</sup> Florian Trinter,<sup>ad</sup> Tillmann Buttersack,<sup>a</sup> Christophe Nicolas,<sup>e</sup> John Bozek,<sup>e</sup> Uwe Hergenhahn,<sup>a</sup> Harald Oberhofer,<sup>bf</sup> Bernd Winter,<sup>a</sup> Karsten Reuter<sup>\*a</sup> and Hendrik Bluhm<sup>\*a</sup>

Correction for 'Photoelectron angular distributions as sensitive probes of surfactant layer structure at the liquid–vapor interface' by Rémi Dupuy *et al.*, *Phys. Chem. Chem. Phys.*, 2022, **24**, 4796–4808, <https://doi.org/10.1039/D1CP05621B>.

The authors would like to correct a typographical error on page 4798, right column, second paragraph of subsection 2.4, where the  $\epsilon$  value of the Lennard-Jones potential used for the  $\text{Na}^+$  ions was reported with an incorrect unit as  $0.01814 \text{ kcal mol}^{-1}$ . The correct unit is  $\text{kJ mol}^{-1}$ . The full correct sentence should thus read:

"For sodium cations, we used a Lennard-Jones (LJ) potential with  $\epsilon = 0.01814 \text{ kJ mol}^{-1}$  and  $\sigma = 3.206 \text{ \AA}$ ."

The correct value of  $\epsilon = 0.01814 \text{ kJ mol}^{-1}$  was used in all calculations, and thus the results of the calculations and the conclusions based on them are not affected by this error.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
