Environmental Science: Atmospheres

rsc.li/esatmospheres

The Royal Society of Chemistry is the world’s leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

IN THIS ISSUE

ISSN 2634-3606  CODEN ESANC9  3(8) 1127–1244 (2023)

EDITORIAL

1133

Outstanding Reviewers for Environmental Science: Atmospheres in 2022

PAPERS

1134

Detection of ship emissions from distillate fuel operation via single-particle profiling of polycyclic aromatic hydrocarbons

Lukas Anders, Julian Schade, Ellen Iva Rosewig, Thomas Kröger-Badge, Robert Irsig, Seongho Jeong, Jan Bendl, Mohammad Reza Saraji-Bozorgzad, Jhih-Hong Huang, Fu-Yi Zhang, Chia C. Wang, Thomas Adam, Martin Sklorz, Uwe Etzien, Bert Buchholz, Hendryk Czech, Thorsten Streibel, Johannes Passig* and Ralf Zimmermann
Environmental Science: Atmospheres

Interdisciplinary open access journal advancing the understanding of atmospheric science and related challenges.

rsc.li/esatmospheres

Led by Neil Donahue (Carnegie Mellon University), Environmental Science: Atmospheres is a gold open access journal committed to bringing the wider environmental science and climate change communities together in a fresh, open approach.

Editorial Board

Editor-in-Chief
Neil Donahue, Carnegie Mellon University, USA
Lin Wang, Fudan University, China
Prashant Kumar, University of Surrey, UK

Associate Editors
Claudia Mohr, Paul Scherrer Institute, Switzerland
Nanne Prisle, University of Oulu, Finland

Members
Joel Thornton, University of Washington, USA
Dwayne Heard, University of Leeds, UK

Advisory Board

Katey Aliferi, University of Cape Town, South Africa
Fedrico Bianchi, University of Helsinki, Finland
Muhammad Bilal, Nanjing University of Information Science & Technology, China
William Bloss, University of Birmingham, UK
Ann Marie Carlton, University of California, Irvine, USA
Peter DeCarlo, Johns Hopkins University, USA
Aijiun Ding, Nanjing University, China
Delphine Farmer, Colorado State University, USA
Barbara Finlayson-Pitts, University of California, Irvine, USA
Christian George, CNRS, University Claude Bernard Lyon 1, France
Marianne Glasius, Aarhus University, Denmark
Mattias Hallquist, University of Gothenberg, Sweden
Thomas Hanisco, NASA Goddard Space Flight Center, USA
Lucy Hutyra, Boston University, USA
Maria Kanakidou, University of Crete, Greece
Prashant Kumar, University of Surrey, UK
Yuhin Kumar Mandal, National Physical Laboratory, India
Linsey Marr, Virginia Tech, USA
Randall Martin, Washington University in St-Louis, USA
Ottmar Möhler, Karlsruhe Institute of Technology, Germany
Yujing Mu, Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, China

Information for Authors

Full details on how to submit material for publication in Environmental Science: Atmospheres are given in the Instructions for Authors (available from http://www.rsc.org/authors). Submissions should be made via the journal’s homepage: rsc.li/esatmospheres

Authors may reproduce/republish portions of their published contribution without seeking permission from the Royal Society of Chemistry, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)–Reproduced by permission of the Royal Society of Chemistry.

This journal is © The Royal Society of Chemistry 2023. Apart from fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act 1988 and the Copyright and Related Rights Regulation 2003, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the Publishers or in the case of reprographic reproduction in accordance with the terms of licences issued by the Copyright Licensing Agency in the UK.

Registered charity number: 207890
Co-photolysis of mixed chromophores affects atmospheric lifetimes of brown carbon

Yalin Wang, Tian Qiu, Cong Zhang, Tianwei Hao, Beatrix Rosette Go Mabato, Ruifeng Zhang, Masao Gen, Man Nin Chan, Dan Dan Huang, Xinlei Ge, Junfeng Wang, Lin Du, Ru-Jin Huang, Qi Chen, Ka In Hoi, Kai Meng Mok, Chak K. Chan and Yong Jie Li*

Emerging investigator series: a machine learning approach to quantify the impact of meteorology on tropospheric ozone in the inland southern California

Khanh Do, Manasi Mahish, Arash Kashifi Yeganeh, Ziqi Gao, Charles L. Blanchard and Cesunica E. Ivey*

Different chlorine and hydroxyl radical environments impact m-xylene oxidation products

Nirvan Bhattacharyya, Mrinali Modi, Leif G. Jahn and Lea Hildebrandt Ruiz*

A portable sensor for the determination of tree canopy air quality

William Berelson,* Nick Rollins, Jinsol Kim, Emma Johnson, Esther Margulies, Naman Casas, Beau MacDonald and John Wilson
1195

The synergistic role of sulfuric acid, ammonia and organics in particle formation over an agricultural land

Lubna Dada,* Magdalena Okuljar, Jiali Shen, Miska Olin, Yusheng Wu, Laura Heimsch, Ilkka Herlin, Saara Kankaanrinta, Markus Lampimäki, Joni Kalliokoski, Rima Baalbaki, Annalea Lohila, Tuukka Petäjä, Miikka Dal Maso, Jonathan Duplissy, Veli-Matti Kerminen and Markku Kulmala*

1212

Negligible increase in indoor endotoxin activity by 222 nm far-UVC illumination on bioaerosols

Zhancong Liang, Tim Yiu Cheung, Wing Lam Chan, Chee Kent Lim, Alvin. C. K. Lai, Patrick. K. H. Lee and Chak K. Chan*

Negligible increase in indoor endotoxic risk

1221

Anthropogenic secondary organic aerosol and ozone production from asphalt-related emissions

Karl M. Seltzer,* Venkatesh Rao, Havala O. T. Pye, Benjamin N. Murphy, Bryan K. Place, Peeyush Khare, Drew R. Gentner, Christine Allen, David Cooley, Rich Mason and Marc Houyoux

1231

Surface functionality of sub- to full-monolayer organic coverage of water aerosols determined by molecular dynamics simulations

Aisling C. Stewart, Martin J. Paterson and Stuart J. Greaves*
