# Iontronics: from fundamentals to ion-controlled devices

John McIntyre Conference Centre, Edinburgh, UK and online 21st–23rd June 2023

# **FARADAY DISCUSSIONS**

Volume 246, 2023

The Faraday Community for Physical Chemistry of the Royal Society of Chemistry, previously the Faraday Society, was founded in 1903 to promote the study of sciences lying between chemistry, physics and biology.

Faraday Discussions

### www.rsc.org/faraday d

A General Discussion on Iontronics: from fundamentals to ion-controlled devices was held in Edinburgh, UK and online on the 21st, 22nd and 23rd of June 2023.

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

### Cover

See Marbach et al., Faraday Discuss., 2023, 246, 225-250.

Colorful spheres represent ionic diversity that is harvested by iontronics. Counting ions in finite volumes, or cubes, in time, sheds light on their exotic dynamics.
