

Industrial Chemistry & Materials

An international journal of significant innovative research and major technological breakthroughs in all aspects of industrial chemistry and materials

rsc.li/icm

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

THEMED ISSUE ARTICLES

MINI REVIEWS

475

Cutting-edge methods for amplifying the oxygen evolution reaction during seawater electrolysis: a brief synopsis

Xiang Lyu* and Alexey Serov

486

Recent progress in high-loading single-atom catalysts and their applications

Jiahui Luo, Geoffrey I. N. Waterhouse, Lishan Peng* and Qingjun Chen*

Editorial Staff

Managing Editor

Jing Kong

Assistant Editors

Huixian Dong, Xitong Wang

Content Development Editor

Yuwei Liang

Editorial Production Manager

Daniella Ferluccio

Regional Publisher

Guanqun Song

Publisher

Neil Hammond

Journals Launch Manager

Kathryn Gempf

For queries about submitted papers, please contact Sarah Whitbread Editorial Production Manager, in the first instance. E-mail: icmprod@rsc.org

ICM (Print ISSN 2755-2608; Online ISSN 2755-2500) is published 4 times a year by the Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge, CB4 0WF, UK.

ICM is a Gold Open Access journal and all articles are free to read

Industrial Chemistry & Materials

rsc.li/icm

Industrial Chemistry & Materials (ICM) publishes significant innovative research and major technological breakthroughs in all aspects of industrial chemistry and materials, with a particular focus on the important innovation of low-carbon chemical industry, energy and functional materials.

Editor-in-Chief

Suojiang Zhang, Institute of Process

Engineering, CAS, China /

Henan University, China

Associate Editor

Maohong Fan, University of Wyoming, USA

Chao Lu, Zhengzhou University/Beijing

University of Chemical Technology, China

Anja V. Mudring, Aarhus University,

Denmark

Rong Sun, Shenzhen Institute of Advanced

Electronic Materials, CAS, China

Quanhong Yang, Tianjin University, China

Shouliang Yi, National Energy Technology

Laboratory, USA

Tierui Zhang, Technical Institute of Physics

and Chemistry, CAS, China

Xiangping Zhang, Institute of Process

Engineering, CAS, China

Advisory board

Matthias Beller, LIKAT Rostock, Germany

Xianhe Bu, Nankai University, China

Yu Fang, Shaanxi Normal University, China

Jerzy Leszczynski, Jackson State University, USA

Qilong Ren, Zhejiang University, China

Blake A. Simmons, Lawrence Berkeley

National Laboratory, USA

Chunming Xu, China University of Petroleum, China

Donghui Zhang, Dalian Institute of

Chemical Physics, CAS, China

Editorial board members

Santiago Aparicio, University of Burgos, Spain

Hongbin Cao, Institute of Process

Engineering, CAS, China

George Zheng Chen, University of

Nottingham, UK

Liwei Chen, Shanghai Jiao Tong University,

China

Weihua Chen, Zhengzhou University, China

Walid Daoud, City University of Hong Kong,

China

Shoubhik Das, University of Antwerp,

Belgium

Xianfeng Fan, University of Edinburgh, UK

Mara G. Freire, University of Aveiro, Portugal

Feng Gao, Linköping University, Sweden

Yanlong Gu, Huazhong University of Science

and Technology, China

Ruilan Guo, University of Notre Dame, USA

Yu Han, King Abdullah University of Science

and Technology, Saudi Arabia

Niklas Hedin, Stockholm University, Sweden

Peter Hessemann, University of Montpellier,

France

John D. Holbrey, Queen's University Belfast,

UK

Xu Hou, Xiamen University, China

Yongsheng Hu, Institute of Physics, CAS,

China

Anker Degn Jensen, Technical University of

Denmark, Denmark

Xiaoyan Ji, Lulea University of Technology,

Sweden

Arjan W. Kleij, Institute of Chemical

Research of Catalonia, Spain

Changzhi Li, Zhejiang University, China

Xianfeng Li, Dalian Institute of Chemical

Physics, CAS, China

Yingwei Li, South China University of

Technology, China

Di-jia Liu, Argonne National Laboratory, USA

Jianmei Lu, Soochow University, China

Xiang Ma, East China University of Science

and Technology, China

Anton Middelberg, The University of

Adelaide, Australia

Kotohiro Nomura, Tokyo Metropolitan

University, Japan

Lijia Pan, Nanjing University, China

Srikanth Pilla, Clemson University, USA

Albert Poater, University of Girona, Spain

Jieshan Qiu, Beijing University of Chemical

Technology, China

Mark B. Shiflett, University of Kansas, USA

Weiqun Shi, Institute of High Energy

Physics, CAS, China

Seema Singh, Joint BioEnergy Institute, USA

Zhi Sun, Institute of Process Engineering,

CAS, China

Atsushi Urakawa, Delft University of

Technology, Netherlands

Xiangjian Wan, Nankai University, China

Guoxiu Wang, University of Technology

Sydney, Australia

Jianguo Wang, Zhejiang University of

Technology, China

Yapei Wang, Renmin University of China,

China

Yuen Wu, University of Science and

Technology of China, China

Qun Xu, Zhengzhou University, China

Yijun Xu, Fuzhou University, China

Feng Yan, Soochow University, China

Chunxia Zhao, The University of Adelaide,

Australia

Huijun Zhao, Griffith University, Australia

Haitao Zhang, Institute of Process

Engineering, CAS, China

Xin Zhang, Institute of Process Engineering,

CAS, China

Ying Zhang, University of Science and

Technology of China, China

Gengfeng Zheng, Fudan University, China

Ying Zheng, Western University, Canada

Information for Authors

Full details on how to submit material for publication in ICM are given in the Instructions for Authors (available from <https://www.rsc.org/journals-books-databases/about-journals/industrial-chemistry-materials>). Submissions should be made via the journal's homepage: rsc.li/icm

Authors may reproduce/republish portions of their published contribution without seeking permission from the Royal Society of Chemistry, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)–Reproduced by permission of the Royal Society of Chemistry.

This journal is owned by the © Institute of Process Engineering, Chinese Academy of Sciences, China 2022.

Apart from fair dealing for the purposes of research or private study for non-commercial purposes, or criticism or review, as permitted under the Copyright, Designs and Patents Act 1988 and the Copyright and Related Rights Regulation 2003, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the Publishers or in the case of reprographic reproduction in accordance with the terms of licences issued by the Copyright Licensing Agency in the UK. 501

Does the platinum-loading in proton-exchange membrane fuel cell cathodes influence the durability of the membrane-electrode assembly?

Ricardo Sgarbi, William Ait Idir, Quentin Labarde, Michel Mermoux, Peizhe Wu, Julia Mainka, Jérôme Dillet, Clémence Marty, Fabrice Micoud, Olivier Lottin and Marian Chatenet*

»The degradation mechanisms do not depend on the cathode Pt loading in contrast to the rate of Ostwald ripening

»The degradation rate is initially faster for the low cathode Pt loading MEA

516

The effect of grafted alkyl side chains on the properties of poly(terphenyl piperidinium) based high temperature proton exchange membranes

Xuefu Che, Lele Wang, Ting Wang, Jianhao Dong and Jingshuai Yang*

526

Highly active ZIF-8@CNT composite catalysts as cathode materials for anion exchange membrane fuel cells

Rohit Kumar, Marek Mooste, Zubair Ahmed, Srinu Akula, Ivar Zekker, Margus Marandi, Maike Käär, Jaan Leis, Arvo Kikas, Alexey Treshchalov, Markus Otsus, Jaan Aruväli, Vambola Kisand, Aile Tamm and Kaido Tammeveski*

542

Unveiling the particle size effect and surface reactivity of Pt/C nanoparticles for ammonia electrooxidation using *in situ* infrared spectroscopy

Niloofer Aligholizadeh K, Ashwini Reddy N, Evans A. Monyoncho and Elena A. Baranova*

PAPERS

553

Effect of the calcination temperature on the characteristics of Ni/Fe-oxide electrocatalysts for application in anion exchange membrane electrolyzers

Angela Capri, Irene Gatto, Carmelo Lo Vecchio and Vincenzo Baglio*

REGULAR RESEARCH ARTICLES

REVIEWS

563

Lithium-mediated electrochemical dinitrogen reduction reaction

Muhammad Saqlain Iqbal, Yukun Ruan, Ramsha Iftikhar, Faiza Zahid Khan, Weixiang Li, Leiduan Hao,* Alex W. Robertson, Gianluca Percoco and Zhenyu Sun*

582

Recent progress with the application of organic room-temperature phosphorescent materials

Mengxing Ji and Xiang Ma*

595

General temperature range: 400–900 °C

Electrolysis technique: constant voltage or constant current

Overview of CO₂ capture and electrolysis technology in molten salts: operational parameters and their effects

Qiuji Zhu, Yimin Zeng* and Ying Zheng*

CORRECTIONS

618

Correction: Hierarchically ordered porous carbon with atomically dispersed cobalt for oxidative esterification of furfural

Wen Yao, Chenghong Hu, Yajie Zhang, Hao Li, Fengliang Wang, Kui Shen, Liyu Chen* and Yingwei Li*

620

Correction: Lithium-mediated electrochemical dinitrogen reduction reaction

Muhammad Saqlain Iqbal, Yukun Ruan, Ramsha Iftikhar, Faiza Zahid Khan, Weixiang Li, Leiduan Hao,* Alex W. Robertson, Gianluca Percoco and Zhenyu Sun*
