

Industrial Chemistry & Materials

An international journal of significant innovative research and major technological breakthroughs in all aspects of industrial chemistry and materials
rsc.li/icm

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

THEMED ISSUE ARTICLES

MINI REVIEWS

475

Cutting-edge methods for amplifying the oxygen evolution reaction during seawater electrolysis: a brief synopsis

Xiang Lyu* and Alexey Serov

486

Recent progress in high-loading single-atom catalysts and their applications

Jiahui Luo, Geoffrey I. N. Waterhouse, Lishan Peng* and Qingjun Chen*

Editorial Staff

Managing Editor
Jing Kong

Assistant Editors
Huixian Dong, Xitong Wang

Content Development Editor
Yuwei Liang

Editorial Production Manager
Daniella Ferlucio

Regional Publisher
Guanqun Song

Publisher
Neil Hammond

Journals Launch Manager
Kathryn Gempf

For queries about submitted papers, please contact Sarah Whitbread Editorial Production Manager, in the first instance. E-mail: icmprod@rsc.org

For pre-submission queries, please contact Jing Kong, Managing Editor
Email: icm@rsc.org

ICM (Print ISSN 2755-2608; Online ISSN 2755-2500) is published 4 times a year by the Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge, CB4 0WF, UK.

ICM is a Gold Open Access journal and all articles are free to read

Industrial Chemistry & Materials

rsc.li/icm

Industrial Chemistry & Materials (ICM) publishes significant innovative research and major technological breakthroughs in all aspects of industrial chemistry and materials, with a particular focus on the important innovation of low-carbon chemical industry, energy and functional materials.

Editor-in-Chief

Suojiang Zhang, Institute of Process Engineering, CAS, China / Henan University, China

Associate Editor

Maozhong Fan, University of Wyoming, USA
Chao Lu, Zhengzhou University/Beijing University of Chemical Technology, China
Anja V. Mudring, Aarhus University, Denmark

Rong Sun, Shenzhen Institute of Advanced Electronic Materials, CAS, China
Quanhong Yang, Tianjin University, China
Shouliang Yi, National Energy Technology Laboratory, USA

Tierui Zhang, Technical Institute of Physics and Chemistry, CAS, China
Xiangping Zhang, Institute of Process Engineering, CAS, China

Advisory board

Matthias Beller, LIKAT Rostock, Germany
Xianhe Bu, Nankai University, China
Yu Fang, Shaanxi Normal University, China
Jerzy Leszczynski, Jackson State University, USA

Qilong Ren, Zhejiang University, China
Blake A. Simmons, Lawrence Berkeley National Laboratory, USA
Chunming Xu, China University of Petroleum, China

Donghui Zhang, Dalian Institute of Chemical Physics, CAS, China

Editorial board members

Santiago Aparicio, University of Burgos, Spain
Hongbin Cao, Institute of Process Engineering, CAS, China
George Zheng Chen, University of Nottingham, UK
Liwei Chen, Shanghai Jiao Tong University, China
Weihua Chen, Zhengzhou University, China
Walid Daoud, City University of Hong Kong, China
Shoubhik Das, University of Antwerp, Belgium
Xianfeng Fan, University of Edinburgh, UK
Mara G. Freire, University of Aveiro, Portugal
Feng Gao, Linköping University, Sweden
Yanlong Gu, Huazhong University of Science and Technology, China
Ruilan Guo, University of Notre Dame, USA
Yu Han, King Abdullah University of Science and Technology, Saudi Arabia
Niklas Hedin, Stockholm University, Sweden
Peter Hesemann, University of Montpellier, France
John D. Holbrey, Queen's University Belfast, UK
Xu Hou, Xiamen University, China
Yongsheng Hu, Institute of Physics, CAS, China

Anker Degn Jensen, Technical University of Denmark, Denmark
Xiaoyan Ji, Lulea University of Technology, Sweden
Arjan W. Kleij, Institute of Chemical Research of Catalonia, Spain
Changzhi Li, Zhejiang University, China
Xianfeng Li, Dalian Institute of Chemical Physics, CAS, China
Yingwei Li, South China University of Technology, China
Di-jia Liu, Argonne National Laboratory, USA
Jianmei Lu, Soochow University, China
Xiang Ma, East China University of Science and Technology, China
Anton Middelberg, The University of Adelaide, Australia
Kotohiro Nomura, Tokyo Metropolitan University, Japan
Lijia Pan, Nanjing University, China
Srikanth Pilla, Clemson University, USA
Albert Poater, University of Girona, Spain
Jieshan Qiu, Beijing University of Chemical Technology, China
Mark B. Shiflett, University of Kansas, USA
Weiqun Shi, Institute of High Energy Physics, CAS, China
Seema Singh, Joint BioEnergy Institute, USA
Zhi Sun, Institute of Process Engineering,

CAS, China
Atsushi Urakawa, Delft University of Technology, Netherlands
Xiangjian Wan, Nankai University, China
Guoxiu Wang, University of Technology Sydney, Australia
Jianguo Wang, Zhejiang University of Technology, China
Yapei Wang, Renmin University of China, China
Yuen Wu, University of Science and Technology of China, China
Qun Xu, Zhengzhou University, China
Yijun Xu, Fuzhou University, China
Feng Yan, Soochow University, China
Chunxia Zhao, The University of Adelaide, Australia
Huijun Zhao, Griffith University, Australia
Haitao Zhang, Institute of Process Engineering, CAS, China
Xin Zhang, Institute of Process Engineering, CAS, China
Ying Zhang, University of Science and Technology of China, China
Gengfeng Zheng, Fudan University, China
Ying Zheng, Western University, Canada

Information for Authors

Full details on how to submit material for publication in ICM are given in the Instructions for Authors (available from <https://www.rsc.org/journals-books-databases/about-journals/industrial-chemistry-materials>). Submissions should be made via the journal's homepage: rsc.li/icm

Authors may reproduce/republish portions of their published contribution without seeking permission from the Royal Society of Chemistry, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)–Reproduced by permission of the Royal Society of Chemistry.

This journal is owned by the © Institute of Process Engineering, Chinese Academy of Sciences, China 2022.

Apart from fair dealing for the purposes of research or private study for non-commercial purposes, or criticism or review, as permitted under the Copyright, Designs and Patents Act 1988 and the Copyright and Related Rights Regulation 2003, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the Publishers or in the case of reprographic reproduction in accordance with the terms of licences issued by the Copyright Licensing Agency in the UK. 501

Does the platinum-loading in proton-exchange membrane fuel cell cathodes influence the durability of the membrane-electrode assembly?

Ricardo Sgarbi, William Ait Idir, Quentin Labarde, Michel Mermoux, Peizhe Wu, Julia Mainka, Jérôme Dillet, Clémence Marty, Fabrice Micoud, Olivier Lottin and Marian Chatenet*

»The degradation mechanisms do not depend on the cathode Pt loading in contrast to the rate of Ostwald ripening

»The degradation rate is initially faster for the low cathode Pt loading MEA

516

The effect of grafted alkyl side chains on the properties of poly(terphenyl piperidinium) based high temperature proton exchange membranes

Xuefu Che, Lele Wang, Ting Wang, Jianhao Dong and Jingshuai Yang*

526

Highly active ZIF-8@CNT composite catalysts as cathode materials for anion exchange membrane fuel cells

Rohit Kumar, Marek Mooste, Zubair Ahmed, Srinu Akula, Ivar Zekker, Margus Marandi, Maik Käär, Jaan Leis, Arvo Kikas, Alexey Treshchalov, Markus Otsus, Jaan Aruväli, Vambola Kisand, Aile Tamm and Kaido Tammeveski*

542

Unveiling the particle size effect and surface reactivity of Pt/C nanoparticles for ammonia electrooxidation using *in situ* infrared spectroscopy

Niloofar Aligholizadeh K, Ashwini Reddy N, Evans A. Monyoncho and Elena A. Baranova*

PAPERS

553

Effect of the calcination temperature on the characteristics of Ni/Fe-oxide electrocatalysts for application in anion exchange membrane electrolyzers

Angela Capri, Irene Gatto, Carmelo Lo Vecchio and Vincenzo Baglio*

REGULAR RESEARCH ARTICLES

REVIEWS

563

Lithium-mediated electrochemical dinitrogen reduction reaction

Muhammad Saqlain Iqbal, Yukun Ruan, Ramsha Iftikhar, Faiza Zahid Khan, Weixiang Li, Leiduan Hao,* Alex W. Robertson, Gianluca Percoco and Zhenyu Sun*

582

Recent progress with the application of organic room-temperature phosphorescent materials

Mengxing Ji and Xiang Ma*

595

General temperature range: 400–900 °C

Electrolysis technique: constant voltage or constant current

Overview of CO₂ capture and electrolysis technology in molten salts: operational parameters and their effects

Qiuji Zhu, Yimin Zeng* and Ying Zheng*

CORRECTIONS

618

Correction: Hierarchically ordered porous carbon with atomically dispersed cobalt for oxidative esterification of furfural

Wen Yao, Chenghong Hu, Yajie Zhang, Hao Li, Fengliang Wang, Kui Shen, Liyu Chen* and Yingwei Li*

620

Correction: Lithium-mediated electrochemical dinitrogen reduction reaction

Muhammad Saqlain Iqbal, Yukun Ruan, Ramsha Iftikhar, Faiza Zahid Khan, Weixiang Li, Leiduan Hao,* Alex W. Robertson, Gianluca Percoco and Zhenyu Sun*
