Correction: Bubble-enhanced ultrasonic microfluidic chip for rapid DNA fragmentation

Lin Sun,^{ab} Thomas Lehnert,^a Songjing Li^b and Martin A. M. Gijs^{*a}

Correction for ‘Bubble-enhanced ultrasonic microfluidic chip for rapid DNA fragmentation’ by Lin Sun *et al.*, *Lab Chip*, 2022, 22, 560–572, <https://doi.org/10.1039/D1LC00933H>.

The authors regret the omission of a reference from the original manuscript, which should have been numbered ref. 55. The reference is shown below as ref. 1 and the sentence below should have been added to the introduction on page 561, after the sentence beginning “Due to the difficulty of preparing and storing the perfluorocarbon nanodroplets...”.

Okabe *et al.* realized DNA fragmentation (>2 kbp) by using lateral cavity acoustic transducers (LCATs) with bubble-induced microstreaming.⁵⁵

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
