rsc.li/nanoscale-advancesCorrection for 'Recent trends in carbon nanotube (CNT)-based biosensors for the fast and sensitive detection of human viruses: a critical review' by Hicham Meskher *et al.*, *Nanoscale Adv.*, 2023, 5, 992–1010, DOI: <https://doi.org/10.1039/D2NA00236A>.

The authors regret that in the caption of Fig. 1, ref. 36 was wrongly attributed as the original source of the figure. The correct figure caption is shown here:

Fig. 1 The assembly of a sandwich-type carbon nanotube (CNT) immunosensor and its detection method is depicted schematically. The antibodies are attached onto CNTs through a poly(allylamine) layer. This figure has been adapted/reproduced from ref. 117 with permission from Wiley, copyright 2014.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
