Correction: Considerable slowdown of short DNA fragment translocation across a protein nanopore using pH-induced generation of enthalpic traps inside the permeation pathway

Loredana Mereuta,[a] Alina Asandei,[b] Ioan Andricioaei,[c] Jonggwan Park,[d] Yoonkyung Park*[e] and Tudor Luchian*[a]

DOI: 10.1039/d3nr90226a

rsc.li/nanoscale

Correction for 'Considerable slowdown of short DNA fragment translocation across a protein nanopore using pH-induced generation of enthalpic traps inside the permeation pathway' by Loredana Mereuta *et al.*, *Nanoscale*, 2023, **15**, 14754–14763, https://doi.org/10.1039/D3NR03344A.

In the caption of Fig. 2, the last sentence: "The recording electrolyte contained 1 M KCl buffered with HEPES at various pH values as indicated, with the *cis*-added 22_ssDNA fragment at a bulk concentration of 4 μM." is incorrect.

The corrected sentence is as follows: "The recording electrolyte contained 1 M KCl buffered with 10 mM HEPES at pH = 7 and respectively 5 mM MES at pH = 5 and pH = 4.5, with the *cis*-added 22_ssDNA fragment at a bulk concentration of 4 μM."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
