Correction for 'The Mössbauer effect using ^{57}Fe -ferrabisdicarbollide ($[\text{o-}^{57}\text{FESAN}]^-$): a glance into the potential of a low-dose approach for glioblastoma radiotherapy' by Ana B. Buades *et al.*, *Inorg. Chem. Front.*, 2022, **9**, 1490–1503, <https://doi.org/10.1039/D1QI01513C>.

The authors regret an error in the original author list and the omission of one co-author who collected and analysed the EPR results.

Since the omitted co-author did not accept to be subsequently included in the list of co-authors, Srećko Valić agrees to withdraw from the paper the part of the results related to EPR measurements, as well as his name from the list of co-authors.

The EPR data in Fig. S4–S6 and the methodology for collecting and analysing the EPR data have been removed from the ESI and the ESI has been republished accordingly. The subsection on 'Paramagnetic properties of $\text{Na}[\text{o-FESAN}]$ ' on page 1492 of the original manuscript should also be removed.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
