Retraction of 'Dipyrrolyl-bis-sulfonamide chromophore based probe for anion recognition' by Namdev V. Ghule *et al.*, *RSC Adv.*, 2014, 4, 27112–27115, <https://doi.org/10.1039/C4RA04000G>.

The Royal Society of Chemistry, with the agreement of the authors, hereby wholly retracts this *RSC Advances* article following an institutional investigation carried out by RMIT University.

Fig. 1 and S5 both contain several identical vials representing different experiments. These figures were previously corrected before the Royal Society of Chemistry was aware that this paper was the subject of an institutional investigation.

The investigation found that this paper “breached the Australian Code and RMIT Research Policy by not ensuring that conclusions are justified by the results and not responsibly disseminating research findings”. A recommendation was given that this paper is retracted.

Dr Namdev V. Ghule was fully responsible for the error that happened in the figures. All other authors, Prof. Sheshanath V. Bhosale and Dr Sidhanath V. Bhosale, are not responsible for this error.

Signed: Namdev V. Ghule, Sheshanath V. Bhosale and Sidhanath V. Bhosale
