We would like to take this opportunity to thank all of *Chemical Science*'s reviewers for helping to preserve quality and integrity in chemical science literature.

We would also like to highlight the Outstanding Reviewers for *Chemical Science* in 2022. Each one of our outstanding peer reviewers has been carefully selected by our editorial team and includes active researchers who have made significant contributions to peer review and have gone above and beyond in their actions.

Our aim is to showcase and recognize the quality and diversity of the fantastic reviewers in the chemical sciences community. Therefore, the list below includes reviewers who have provided a higher-than-average number of top-quality reviewer reports, but we have also highlighted reviewers who have provided highly detailed reports, reviewers who have been specifically noted for providing constructive feedback that has helped authors improve their manuscripts, and also adjudicative reviewers who have provided thoughtful and robust reports for manuscripts with conflicting referee recommendations.

Alongside our list of Outstanding Reviewers for *Chemical Science*, we take pride in highlighting our fantastic reviewers all year long *via* our Reviewer Spotlight blog, which highlights a selection of reviewers every month. We continue to work on improving the

diversity of our reviewer pool to reflect the diversity of the communities that we serve. You can read our Reviewer Spotlight blog at <https://blogs.rsc.org/sc/category/reviewer-spotlight/> and can also keep an eye on our journal Twitter account @ChemicalScience to see which reviewers we will be promoting each month.
