Correction: The influence of chirality on the behavior of oligonucleotides inside cells: revealing the potent cytotoxicity of G-rich L-RNA

Chen-Hsu Yu and Jonathan T. Szczepanski*

Correction for 'The influence of chirality on the behavior of oligonucleotides inside cells: revealing the potent cytotoxicity of G-rich L-RNA' by Chen-Hsu Yu *et al.*, *Chem. Sci.*, 2023, **14**, 1145–1154, <https://doi.org/10.1039/D2SC05511B>.

The originally published version of this manuscript contained an incorrect figure for Fig. 3. The original Fig. 3 showed a toxicity time-course for *D*-Me(GGAA)₈ compared to *L*-r(GGAA)₈ when the intended graphic should have shown a toxicity time-course for hairpin *L*-r(GC/GC) compared to *L*-r(GGAA)₈. The correct version of Fig. 3 is as follows, and replaces that within the original manuscript.

Fig. 3 Time-dependent viability assay (CCK-8) of HeLa cells treated with 200 nM of *L*-r(GC/GC) hairpin. *L*-r(GGAA)₈ is shown for reference. Data are mean \pm S.D. ($n = 3$ biological replicates).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
