Soft Matter

Where physics meets chemistry meets biology for fundamental soft matter research

rsc.li/soft-matter-journal

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

REVIEW

9344

Geometry-structure models for liquid crystal interfaces, drops and membranes: wrinkling, shape selection and dissipative shape evolution

Ziheng Wang, Phillip Servio and Alejandro D. Rey*

COMMUNICATION

9365

Platinum(II) terpyridine-based supramolecular polymer gels with induced chirality

Hyoung Wook Kang, Ji Ha Lee,* Moo Lyong Seo* and Sung Ho Jung*

Editorial Staff

Executive Editor Maria Southall

Deputy Editor

Laura Ghandhi

Editorial Production Manager Chris Goodall

Assistant Editors

Sean Browner, Molly Colgate, Paul Scott, Alison Winder Editorial Assistant

Basita Javeed

Publishing Assistant

Allison Holloway

Sam Keltie

For queries about submitted papers, please contact Chris Goodall, Editorial Production Manager in the first instance E-mail: softmatter@rsc.org

For pre-submission queries please contact Maria Southall, Executive Editor. E-mail: softmatter-rsc@rsc.org

Soft Matter (electronic: ISSN 1744-6848)

is published 48 times a year by the Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge, UK CB4 0WF.

All orders, with cheques made payable to the Royal Society of Chemistry, should be sent to the Royal Society of Chemistry Order Department, Royal Society of Chemistry,

Thomas Graham House, Science Park, Milton Road, Cambridge, CB4 0WF, UK

Tel +44 (0)1223 432398; E-mail: orders@rsc.org

2023 Annual (electronic) subscription price: £1641; \$2891. Customers in Canada will be subject to a surcharge to cover GST. Customers in the EU subscribing to the electronic version only will be charged VAT.

If you take an institutional subscription to any Royal Society of Chemistry journal you are entitled to free, site-wide web access to that journal. You can arrange access via Internet Protocol (IP) address at www.rsc.org/ip

Customers should make payments by cheque in sterling payable on a UK clearing bank or in US dollars payable on a US clearing bank.

Soft Matter

rsc.li/soft-matter-journal

An interdisciplinary journal focusing on innovative soft matter topics through original research amd reviews.

Editorial Board

Editor-in-Chief Alfred Crosby, University of Massachusetts Amherst, USA Associate Editors Roberto Cerbino, University of Vienna, Austria Lorna Dougan, University of Leeds, UK Ewa Górecka, Warsaw University, Poland Sanat Kumar, Columbia University, USA Guruswamy Kumaraswamy, Indian Institute of Technology Bombay, India Zhihong Nie, Fudan University, China Amy Shen, Okinawa Institute of Science and Technology, Japan Lixin Wu, Jilin University, China Emanuela Zaccarelli, Sapienza University of Rome, Italy Xuehua Zhang, University of Alberta, Canada

Glenn Fredrickson, University of California at Santa David Quéré, ESPCI, France Barbara, USA Sriram Ramaswamy, Indian Institute of Science

Information for Authors

Full details on how to submit material for publication in Soft Matter are given in the Instructions for Authors (available from http:// www.rsc.org/authors). Submissions should be made via the journal's homepage: rscil/soft matter-journal. Submissions: The journal welcomes submissions of manuscripts for publication as Full Papers, Communications, Reviews, Perspectives, Tutorial Reviews. Full Papers and Communications should describe original work of high quality and impact.

Additional details are available from the Editorial Office or http://www.rsc.org/authors

Authors may reproduce/republish portions of their published contribution without seeking permission from the Royal Society of Chemistry, provided that any such republication is accompanied by an acknowledgement in the form: (Original Citation)–Reproduced by permission of the Royal Society of Chemistry.

9369

Capillary washboarding during slow drainage of a frictional fluid

Louison Thorens, Knut J. Måløy, Eirik G. Flekkøy, Bjørnar Sandnes, Mickaël Bourgoin and Stéphane Santucci*

9379

Extracting microscopic insight from transient dielectric measurements during large amplitude oscillatory shear

Noah H. Cho, Jiachun Shi, Ryan P. Murphy, John K. Riley, Simon A. Rogers and Jeffrey J. Richards*

9389

Bridging the gap between collective motility and epithelial-mesenchymal transitions through the active finite voronoi model

Junxiang Huang, Herbert Levine and Dapeng Bi*

9399

Discontinuous rigidity transition associated with shear jamming in granular simulations

Varghese Babu,* H. A. Vinutha, Dapeng Bi and Srikanth Sastry*

9405

9413

10⁰

и И 10⁻¹

10-2 10-1

Real Vega :

Shear wave generation from non-spherical bubble collapse in a tissue phantom

Saber Izak Ghasemian,* Fabian Reuter, Yuzhe Fan, Georg Rose and Claus-Dieter Ohl

Rheology and dispensing of real and vegan mayo: the chickpea or egg problem

Nadia N. Nikolova, Carina D. V. Martínez Narváez, Lena Hassan, Reed A. Nicholson, Michael W. Boehm, Stefan K. Baier and Vivek Sharma*

Long term water trapping in Pickering emulsions undergoing compositional ripening

Raj Tadi,* Beth Green, Thomas Curwen and Paul S. Clegg

9435

Structure-property relationships of epoxy functionalized enoate ester-based tailored hybrid gels doped with different polysaccharides

Mertcan Er and Nermin Orakdogen*

9460

Janus-type ionic conductive gels based on poly(*N*,*N*-dimethyl)acrylamide for strain/pressure sensors

Chuanjiang Zhou, Yijia Yu, Wenjuan Xia, Shengjie Liu, Xiao Song, Zhaoqiang Wu* and Hong Chen

9470

Thiol-ene chemistry incorporates a new spiropyran-containing polyurethane ionogel with photochromic, photomechanical and photoconductive properties

Guoneng Chen, Riyan Lin, Yanshi Lei, Peng Cai, Yifu Huang* and Hefeng Zhang

9478

Balanced chemical reactivity, antimicrobial properties and biocompatibility of decellularized dermal matrices for wound healing

Xuantao Huang, Zhuang Ding, Rongxin Feng, Xin Zheng, Na Yang, Yining Chen and Nianhua Dan*

9489

Amphiphilic monomers bridge hydrophobic polymers and water

Guido L. A. Kusters, Guogao Zhang, Zheqi Chen and Zhigang Suo*

Highly stable petroleum pitches provide access to the deep glassy state

Heedong Yoon, James Heinzman, Stuart E. Smith, Manesh Gopinadhan, Kazem V. Edmond, Amy C. Clingenpeel and Nicolas J. Alvarez*

Active self-assembly of colloidal machines with passive rotational parts *via* coordination of phoresis and osmosis

Nan Yu, Zameer Hussain Shah, Majid Basharat, Shuo Wang, Xuemao Zhou, Guanhua Lin, Scott A. Edwards, Mingcheng Yang* and Yongxiang Gao*

A biomass-derived dual crosslinked DNA-nanoparticle hydrogel for visible light-induced photodynamic bacterial inactivation

Gourab Das, Suman Nayak, Dinesh Kumar Kotness and Prolay Das*

8

9511

The combined effect of cohesion and finite size on the collapse of wet granular columns

Yisong Wu, Yinghao Sun and Dengming Wang*

9531

Glassy phases of the Gaussian core model

Vittoria Sposini,* Christos N. Likos and Manuel Camargo

9541

Dynamics of non-spherical particles in viscoelastic fluids flowing in a microchannel

Langella A., Franzino G., Maffettone P. L., Larobina D. and D'Avino G.*
