

# Journal of Materials Chemistry A

Materials for energy and sustainability

[rsc.li/materials-a](https://rsc.li/materials-a)

Themed issue: 10th Anniversary issue: Celebrating 10 years of Journal of Materials Chemistry A

ISSN 2050-7488

**COMMUNICATION**

Miriam M. Unterlass *et al.*

Urethane functions can reduce metal salts under hydrothermal conditions: synthesis of noble metal nanoparticles on flexible sponges applied in semi-automated organic reduction
