Correction for 'A polyhexamethylene biguanide-assembly assisted strategy of dentin bonding greatly promotes bonding effects and caries treatment' by Chang Shu *et al.*, *J. Mater. Chem. B*, 2023, **11**, 10908–10922, <https://doi.org/10.1039/D3TB02083E>.

The authors regret an error in the section 3.1 of the Results and discussion. "...and dry bonding (from 43.76 ± 5.42 MPa to 40.50 ± 5.24 MPa, $p > 0.9999$) modes." should be corrected to "from 40.61 ± 5.29 MPa to 37.24 ± 5.87 MPa, $p > 0.9999$ ".

The corrected sentences should read:

"In the SPB system, after thermal cycling, the μ TBS of the control group significantly drops from 36.33 ± 3.81 MPa to 27.97 ± 4.33 MPa ($p = 0.0275$), while that of the PHMB group is stable in both the wet bonding (from 43.76 ± 5.42 MPa to 40.50 ± 5.24 MPa, $p > 0.9999$) and dry bonding (40.61 ± 5.29 MPa to 37.24 ± 5.87 MPa, $p > 0.9999$) modes."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
