Correction: A polyhexamethylene biguanide-assembly assisted strategy of dentin bonding greatly promotes bonding effects and caries treatment

Chang Shu, a Yadong Chen, a Zhenzhen Zhang, a Yuqing Lei, a Jiajia Xu, a Weiwei Lao, a Qingping Xi, a Qiang Sun, a Xiaojun Li, a Hongbing Liao, b Qiaojie Luo* a and Xiaodong Li a

The authors regret an error in the section 3.1 of the Results and discussion. “…and dry bonding (from 43.76 ± 5.42 MPa to 40.50 ± 5.24 MPa, p > 0.9999) modes.” should be corrected to “from 40.61 ± 5.29 MPa to 37.24 ± 5.87 MPa, p > 0.9999”.

The corrected sentences should read:

“In the SPB system, after thermal cycling, the μTBS of the control group significantly drops from 36.33 ± 3.81 MPa to 27.97 ± 4.33 MPa (p = 0.0275), while that of the PHMB group is stable in both the wet bonding (from 43.76 ± 5.42 MPa to 40.50 ± 5.24 MPa, p > 0.9999) and dry bonding (40.61 ± 5.29 MPa to 37.24 ± 5.87 MPa, p > 0.9999) modes.”

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
