

RSC Advances

**At the heart of open access for
the global chemistry community**

Editor-in-chief

Russell J Cox

Leibniz Universität Hannover, Germany

We stand for:

Breadth We publish work in all areas of chemistry and reach a global readership

Quality Research to advance the chemical sciences undergoes rigorous peer review for a trusted, society-run journal

Affordability Low APCs, discounts and waivers make publishing open access achievable and sustainable

Community Led by active researchers, we publish quality work from scientists at every career stage, and all countries

Submit your work now

Showcasing research from Professor Holger Helten's laboratory, Julius-Maximilians-Universität Würzburg, Institute of Inorganic Chemistry and Institute of Sustainable Chemistry & Catalysis with Boron (ICB), Germany. The cover image was designed and illustrated by Tina Schneider.

Hybrid materials comprising ferrocene and diaminoborane moieties: linear concatenation *versus* macrocyclization

The treasure chest represents the wide variety of possible compounds that can be created by combining borane and diaminoferrocene units. In our work we present macrocycles of different sizes, oligomers, and a polymer.
