Correction for 'Continuous flow oxidation of HMF using a supported AuPd-alloy' by Dominik Neukum  
et al., *Catal. Sci. Technol.*, 2024, <https://doi.org/10.1039/d3cy01722b>.[rsc.li/catalysis](https://rsc.li/catalysis)

The authors regret that there was an error with the LHSV unit in certain positions in the original article. In all instances, the LHSV unit should be  $\text{h}^{-1}$ . The conclusions, calculations and comparisons in the manuscript were based on the correct unit ( $\text{h}^{-1}$ ), therefore the results remain unaltered.

A list of positions where the LHSV unit has to be corrected is as follows:

- Caption of Fig. 3: "... (LHSV: 7.7  $\text{h}^{-1}$ ) ... (LHSV: 5  $\text{h}^{-1}$ ) ... (LHSV: 1.9  $\text{h}^{-1}$ ; ..."
- Caption of Fig. 4: "... LHSV: 5  $\text{h}^{-1}$ ."
- Caption of Fig. 5: "... (a) ... LHSV: 5  $\text{h}^{-1}$  and (b) ... LHSV: 3.4  $\text{h}^{-1}$ ."
- Caption of Fig. 6: "... LHSV: 31.4  $\text{h}^{-1}$ ."
- Main text on Page 6: "... and a LHSV of 31.4  $\text{h}^{-1}$  corresponds..."; "... LHSV: 19.6  $\text{h}^{-1}$ , to assess..."; "... (0.1 M HMF, 6 eq.  $\text{Na}_2\text{CO}_3$ , 100 °C,  $67 \pm 5$  bar, LHSV: 31.4  $\text{h}^{-1}$ , 6 h time on stream)..."
- Caption of Fig. 7: "... LHSV: 19.6  $\text{h}^{-1}$ ."
- Table 3, heading of fourth column: "LHSV/ $\text{h}^{-1}$ "
- Caption of Fig. 8: "... LHSV: 19.6  $\text{h}^{-1}$ ."
- Main text on Page 7: "... LHSV: 19.6  $\text{h}^{-1}$  was conducted..."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
