Correction: Addressing the gaps in homeostatic mechanisms of copper and copper dithiocarbamate complexes in cancer therapy: a shift from classical platinum-drug mechanisms

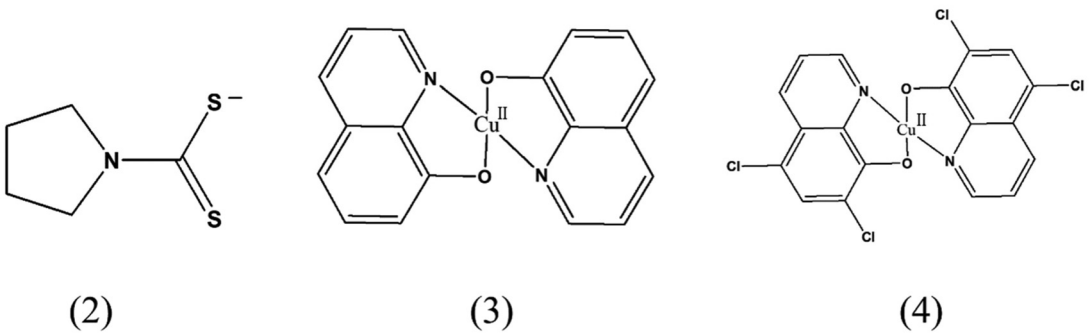
Lydia W. Njenga,[a] Simon N. Mbugua,*[b] Ruth A. Odhiambo[a] and Martin O. Onani[c]

DOI: 10.1039/d3dt90193a

rsc.li/dalton

Correction for 'Addressing the gaps in homeostatic mechanisms of copper and copper dithiocarbamate complexes in cancer therapy: a shift from classical platinum-drug mechanisms' by Lydia W. Njenga *et al.*, *Dalton Trans.*, 2023, **52**, 5823–5847, https://doi.org/10.1039/D3DT00366C.

The authors regret that on page 5824 the structures of compounds **2**, **3** and **4** were incorrect, showing protonated ligands. The corrected structures are shown below.



(2) (3) (4)

Fig. 7 also showed incorrect chemical structures; the corrected figure is shown below.

Fig. 8 also showed incorrect chemical structures; the correct figure is shown below.

On page 5825, the statement "Disulfiram (...) and clioquinol release copper in a reductive intracellular environment and have been shown to have anticancer effects in several clinical trials using mouse models." was supported by incorrect references, and this statement should be supported by references 67, 68, and 16 of the original article.

On page 5831, the statement "The strong trans-influence of the sulphur atoms..." should be rephrased to refer to "the relatively strong trans-influence of the groups coordinated through sulphur atoms...".
