Correction: Acridine-based copper(I) PNP pincer complexes: catalysts for alkyne hydroboration and borylation of aryl halides

Angus Olding,^a Nigel. T. Lucas,^b Curtis C. Ho^{*a} and Alex C. Bissember^{*a}

DOI: 10.1039/d4dt90050b

rsc.li/dalton

Correction for 'Acridine-based copper(I) PNP pincer complexes: catalysts for alkyne hydroboration and borylation of aryl halides' by Angus Olding *et al.*, *Dalton Trans.*, 2024, **53**, 4471–4478, <https://doi.org/10.1039/D3DT04269C>.

The authors regret that there is a minor citation error in their recently published manuscript.

The error is highlighted in the paragraph below from page 4472:

PNP ligand L1. Dicyclohexylphosphine (550 mg, 2.8 mmol, 2.5 equiv.) was added to a magnetically-stirred suspension of 4,5-bis(bromomethyl)acridine (**3**) (400 mg, 1.1 mmol, 1 equiv.) in MeOH (5 mL) maintained under N₂ and the ensuing mixture was heated at 70 °C. After 48 h, the reaction mixture was cooled to r.t. and NEt₃ (0.6 mL, 4.4 mmol, 4 equiv.) was added to the magnetically-stirred mixture. After 2 h, the ensuing mixture was concentrated under reduced pressure. The ensuing residue was subjected to flash column chromatography (silica gel, 0–10% acetone/CH₂Cl₂), to provide the previously unreported compound as an off-white solid (265 mg, 40% yield). Crystals suitable for X-ray crystallography were obtained by crystallisation from benzene/pentane.

The authors incorrectly stated that ligand **L1** is previously unreported. The synthesis (and use) of ligand **L1** has been reported previously.^{1,2}

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
