## Correction: Membrane degassing with the combination of sweep gas and vacuum pressure for ammonia removal

Hongsik Yoon,<sup>a</sup> Jiho Lee,<sup>b</sup> Gunhee Lee,<sup>a</sup> Wanho Shin<sup>a</sup> and Taijin Min<sup>\*a</sup>

Correction for 'Membrane degassing with the combination of sweep gas and vacuum pressure for ammonia removal' by Hongsik Yoon *et al.*, *Environ. Sci. Technol.*, 2023, **9**, 467–473, <https://doi.org/10.1039/D2EW00822J>.

Some values presented in the text for the mass transfer coefficient were in error, missing a minus sign before the exponent. All values in Table 1 were correct. The corrected values are shown below.

In the Water impact statement on page 467, the value of  $2.03 \times 10^3 \text{ m h}^{-1}$  should read  $2.03 \times 10^{-3} \text{ m h}^{-1}$ , and the value of  $3.95 \times 10^3 \text{ m h}^{-1}$  should read  $3.95 \times 10^{-3} \text{ m h}^{-1}$ .

In the Results and discussion section on page 470, the value of  $2.03 \times 10^3 \text{ m h}^{-1}$  should read  $2.03 \times 10^{-3} \text{ m h}^{-1}$ ; the value of  $3.95 \times 10^3 \text{ m h}^{-1}$  should read  $3.95 \times 10^{-3} \text{ m h}^{-1}$ ; the value of  $5.75 \times 10^3 \text{ m h}^{-1}$  should read  $5.75 \times 10^{-3} \text{ m h}^{-1}$ ; the value of  $3.50 \times 10^3 \text{ m h}^{-1}$  should read  $3.50 \times 10^{-3} \text{ m h}^{-1}$ ; and the value of  $2.46 \times 10^3 \text{ m h}^{-1}$  should read  $2.46 \times 10^{-3} \text{ m h}^{-1}$ .

In the Conclusion section on page 472, the value of  $2.03 \times 10^3 \text{ m h}^{-1}$  should read  $2.03 \times 10^{-3} \text{ m h}^{-1}$ , and the value of  $1.18 \times 10^2 \text{ m h}^{-1}$  should read  $3.95 \times 10^{-3} \text{ m h}^{-1}$ .

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
