Correction for 'Membrane degassing with the combination of sweep gas and vacuum pressure for ammonia removal' by Hongsik Yoon et al., Environ. Sci.: Water Res. Technol., 2023, 9, 467-473, https://doi.org/ 10.1039/D2EW00822J

Some values presented in the text for the mass transfer coefficient were in error, missing a minus sign before the exponent. All values in Table 1 were correct. The corrected values are shown below.

In the Water impact statement on page 467, the value of 2.03×10^3 m h⁻¹ should read 2.03×10^{-3} m h⁻¹, and the value of $3.95 \times 10^{3} \text{ m h}^{-1} \text{ should read } 3.95 \times 10^{-3} \text{ m h}^{-1}.$

In the Results and discussion section on page 470, the value of 2.03×10^3 m h⁻¹ should read 2.03×10^{-3} m h⁻¹; the value of 3.95×10^3 m h⁻¹ should read 3.95×10^{-3} m h⁻¹; the value of 5.75×10^3 m h⁻¹ should read 5.75×10^{-3} m h⁻¹; the value of 3.50×10^{-3} m h⁻¹ should read 5.75×10^{-3} m h⁻¹; the value of 3.50×10^{-3} m h⁻¹ should read 3.95×10^{-3} m h⁻¹; the value of 3.50×10^{-3} m h⁻¹ should read 3.95×10^{-3} m h⁻¹; the value of 3.50×10^{-3} m h⁻¹ should read 3.95×10^{-3} m h⁻¹; the value of 3.50×10^{-3} m h⁻¹; the value 10^{3} m h^{-1} should read $3.50 \times 10^{-3} \text{ m h}^{-1}$; and the value of $2.46 \times 10^{3} \text{ m h}^{-1}$ should read $2.46 \times 10^{-3} \text{ m h}^{-1}$.

In the Conclusion section on page 472, the value of 2.03×10^3 m h⁻¹ should read 2.03×10^{-3} m h⁻¹, and the value of 1.18×10^{-3} $10^2 \text{ m h}^{-1} \text{ should read } 3.95 \times 10^{-3} \text{ m h}^{-1}.$

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
