rsc.li/food-functionCorrection for 'Nutrikinetics and urinary excretion of phenolic compounds after a 16-week supplementation with a flavanone-rich ingredient' by Jananee Muralidharan *et al.*, *Food Funct.*, 2023, **14**, 10506–10519, <https://doi.org/10.1039/D3FO02820H>.

The authors regret that there is an error in their original manuscript. The sentence “A flavanone-rich ingredient was obtained by alcohol and/or water extraction from specific varieties of *Citrus paradisi* Macfad (grapefruit), *Citrus sinensis* L. Osbec (sweet orange), and *Paullinia cupana* Kunth (guarana).” on page 10507 in the Supplement composition subsection of the Subjects and methods section should be replaced with “A flavanone-rich ingredient was obtained by alcohol and/or water extraction from specific varieties of *Citrus paradisi* Macfad (grapefruit), *Citrus sinensis* L. Osbeck (sweet orange), *Citrus grandis* L. Osbeck (Pomelo) and *Paullinia cupana* Kunth (guarana).”

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
