Correction for 'Deciphering hepatoma cell resistance to tyrosine kinase inhibitors: insights from a Liver-on-a-Chip model unveiling tumor endothelial cell mechanisms' by Madhu Shree Poddar *et al.*, *Lab Chip*, 2024, **24**, 3668–3678, https://doi.org/10.1039/D4LC00238E.

The authors regret that in the above-titled article, Fig. 5 was presented incorrectly. Specifically, the images representing "***Sorafenib + PBS (Monocancer)***" and "***Sorafenib + CD105 (Monocancer)***" were identical, which was an unintentional mistake. The correct version of Fig. 5 is as follows:

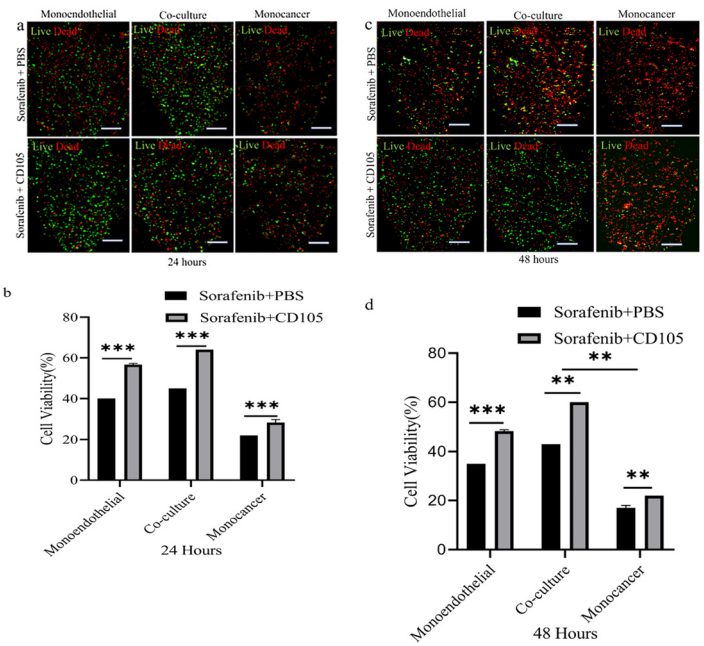

Fig. 5 Cell viability tests were conducted on liver cancer cells with and without treatment with recombinant CD105 in the presence of Sorafenib. (a and c) Representative images of co-culture cell viability using Live/Dead staining assay after (a) 24- and (c) 48-hour incubation, comparing cells in each chamber with and without treatment with recombinant CD105, and with and without Sorafenib. A comparative analysis of cell viability among chambers and culture durations is shown in (b and d). The scale bar is 100 μm.

This was a graphical error confined to this figure and does not affect the data, results, or conclusions of the study in any way. The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
