**Highlighting research from Professor Keiji Tanaka's group  
from the Center for Polymer Interface and Molecular  
Adhesion Science, Kyushu University, Japan**

Effect of interfacial local conformation of polymer chains on  
adhesion strength

The first direct observation of the phase-separated structure  
of PS/PMMA at the solid interface was achieved by SFG  
imaging. The effects of local orientational distribution at  
interfaces on adhesion was also investigated.
