Correction for 'Ocular biocompatibility evaluation of POSS nanomaterials for biomedical material applications' by Chenghui Shen *et al.*, *RSC Adv.*, 2015, 5, 53782–53788, <https://doi.org/10.1039/C5RA08668J>.

The authors regret that the magnification of the cell staining images was missed in the caption of Fig. 4. The corrected caption of Fig. 4 is as shown here. The figures remain the same.

Fig. 4 Fluorescence micrographs of DCFH-DA stained HLECs (A), and cells incubated with 200 mg mL⁻¹ NH₂-POSS (B), HO-POSS (C) or SH-POSS (D), for indicating the intracellular ROS level (200×).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
