Correction for 'DCID-mediated esterification of carboxylic acids with alcohols under mild conditions' by Farzaneh Nasiri *et al.*, *RSC Adv.*, 2023, 13, 27385–27390, <https://doi.org/10.1039/d3ra04048h>.

The authors regret that there were inconsistencies in the mass spectra data in the original electronic supplementary information (ESI).

The authors have repeated their results and provided a new ESI file with new mass spectra data which has been assessed by an independent expert.

The melting point of compound **5c** in Table 2 was incorrect. The correct melting point for compound **5c** is 40–44 °C (ref. 1). The reference below is ref. 17 in the original paper.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
