Retraction: Effects of thermal aging atmospheres on oxidation activity, element composition and microstructure of diesel soot particles

He Huang,* Zifei Ni, Wenkai Wang and Heng Chen

Retraction of 'Effects of thermal aging atmospheres on oxidation activity, element composition and microstructure of diesel soot particles' by He Huang *et al.*, *RSC Adv.*, 2023, 13, 29975–29985, <https://doi.org/10.1039/D3RA05340G>.

The Royal Society of Chemistry, with the agreement of the authors, hereby wholly retracts this *RSC Advances* article due to similarities in the data with an article by C. Peng *et al.*¹ and a Masters thesis by C. Peng² that were not cited in the original article. Huang *et al.* have previously collaborated with C. Peng *et al.*,¹ and errors during data processing led to inaccurate data being presented in this article.

Signed: He Huang, Zifei Ni, Wenkai Wang and Heng Chen

Date: 27th September 2024

Retraction endorsed by Laura Fisher, Executive Editor, *RSC Advances*
