

Chemistry Education Research and Practice

rsc.li/cerp

A fully refereed electronic journal for teachers, researchers and other practitioners in chemistry education

IN THIS ISSUE

ISSN 1756-1108 CODEN CERPCE 25(1) 1–374 (2024)

EDITORIAL

8

How *Chemistry Education Research & Practice* serves chemistry education

Scott E. Lewis

PAPERS

11

Design and impact of a stoichiometry voluntary online course for entering first-year STEM college students

Brayan Diaz* and Arie Aizman

25

Elements constituting and influencing in-service secondary chemistry teachers' pedagogical scientific language knowledge

Corinna Mönch* and Silvija Markic

42

Exploring senior high-school students' understanding of electrochemical concepts: patterns of thinking across Turkish and Indonesian contexts

Canan Nakiboglu,* Sri Rahayu, Nuri Nakiboğlu and David F. Treagust

62

Analysis of resources applied to rationalize elimination mechanisms

Sean Gao, Taylor C. Outlaw, Jason G. Liang-Lin, Alina Feng, Reika Shimomura, Jennifer L. Roizen and Charles T. Cox Jr*

PAPERS

79

Evaluating the level of inquiry in postsecondary instructional laboratory experiments: results of a national survey

Kendall M. Zammit, Megan C. Connor and Jeffrey R. Raker*

92

Children's emergent mechanistic reasoning in chemistry: a case study about early primary students' reasoning about the phenomenon of thermal expansion of air

Astrid Berg* and Magnus Hultén

115

What's in a word? Student beliefs and understanding about green chemistry

Laura B. Armstrong,* Lauren M. Irie, Kelly Chou, Mariana Rivas, Michelle C. Douskey and Anne M. Baranger*

133

Supporting submicroscopic reasoning in students' explanations of absorption phenomena using a simulation-based activity

Natalia Spitha, Yujian Zhang, Samuel Pazicni,* Sarah A. Fullington, Carla Morais, Amanda Rae Buchberger and Pamela S. Doolittle

151

Progression from Chinese High School onto a TransNational Chinese-UK University joint BSc degree in chemistry; an international study focussing on laboratory practical skills

Julie Hyde,* James S. Wright and Andi Xie

PAPERS

171

Making sense of chemical equilibrium: productive teacher–student dialogues as a balancing act between sensemaking and managing tension

Ylva Hamnell-Pamment

193

Implementing team-based learning in a large environmental chemistry course and its impact on student learning and perceptions

Priyanka Lekhi* and Trish Varao-Sousa

212

Different strategies to facilitate meaningful reflections among post-secondary students in a community service learning water project

Karen Ho,* Sahara R. Smith and Douglas B. Clark

225

Exploring relationships that college instructors seek to build with intention in chemistry classrooms

Patricia Moreira* and Vicente Talanquer

242

***How much is just maths?* Investigating problem solving in chemical kinetics at the interface of chemistry and mathematics through the development of an extended mathematical modelling cycle**

Sofie Ye, Maja Elmgren, Magnus Jacobsson and Felix M. Ho*

PAPERS

266

A design-based research approach to improving pedagogy in the teaching laboratory

Christine E. Mundy,* Marietjie Potgieter and Michael K. Seery

276

Effects of formative assessment with technology on students' meaningful learning in chemistry equilibrium concepts

Tadesse Hagos* and Dereje Andargie

300

Chemistry graduate teaching assistants' teacher noticing

Eleni K. Geragosian, Diana Zhu, Marc Skriloff and Ginger V. Shultz*

313

Investigating evidence in support of validity and reliability for data collected with the meaningful learning in the laboratory instrument (MLLI)

Elizabeth B. Vaughan, A. Montoya-Cowan and Jack Barbera*

327

The evolution of an assignment: how a Writing-to-Learn assignment's design shapes organic chemistry students' elaborations on reaction mechanisms

Ina Zaimi, Amber J. Dood and Ginger V. Shultz*

343

Student perceptions of partial charges and nucleophilicity/electrophilicity when provided with either a bond-line, ball-and-stick, or electrostatic potential map for molecular representation

Ayesha Farheen, Nia Martin and Scott E. Lewis*

360

Impact of fill-in-the-nodes concept maps on low prior-knowledge students learning chemistry: a study on the learning achievements and attitude toward concept maps

Quan-Thanh Huynh and Yu-Chuan Yang*
