# Correction: Re-pairing DNA: binding of a ruthenium phi complex to a double mismatch

Tayler D. Prieto Otoya,[a] Kane T. McQuaid,[a] Neil G. Paterson,[b] David J. Cardin,[a] Andrew Kellett[c] and Christine J. Cardin*[a]

Correction for 'Re-pairing DNA: binding of a ruthenium phi complex to a double mismatch' by Tayler D. Prieto Otoya *et al.*, *Chem. Sci.*, 2024, **15**, 9096–9103, https://doi.org/10.1039/D4SC01448K.

The authors regret that in the published version of the paper, the letters in Fig. 2b have shifted upwards on the left-hand side. The correct version of Fig. 2, with its caption, is given herein.

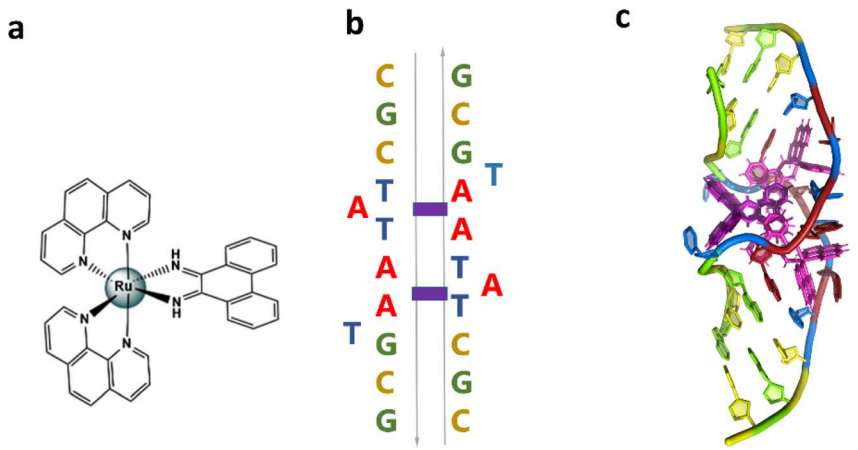

Fig. 2 (a) Structural formula of Λ-[Ru(phen)$_2$phi]$^{2+}$; (b) schematic showing the re-pairing of the bases in the reported structure. The purple blocks highlight the binding sites of the complex. (c) Image showing the large DNA bending. The overall assembly, characterised by a twofold rotational symmetry. Each asymmetric unit is made up of a DNA single strand binding a Λ-[Ru(phen)$_2$phi]$^{2+}$ with occupancy 1 and a Δ-[Ru(phen)$_2$phi]$^{2+}$ with occupancy 0.5. The ruthenium complexes are shown in purple.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
