Showcasing research from the Advanced Nano-Materials Structures and Applications (ANMSA) Research Group, led by Prof. Pola Goldberg Oppenheimer at the University of Birmingham, Birmingham, UK.

Vibrational spectroscopic profiling of biomolecular interactions between oak powdery mildew and oak leaves

This novel approach utilises hybrid Raman spectroscopy with accompanying analytical techniques to investigate, for the first time, the biomolecular interactions between two biological soft matter; English oak (*Quercus robur*) and *Erysiphe alphitoides*.
