Retraction of 'Nickel nanoparticles immobilized on three-dimensional nitrogen-doped graphene as a superb catalyst for the generation of hydrogen from the hydrolysis of ammonia borane' by Mojtaba Mahyari and Ahmad Shaabani, *J. Mater. Chem. A*, 2014, **2**, 16652–16659, https://doi.org/10.1039/C4TA03940H.

The Royal Society of Chemistry hereby wholly retracts this *Journal of Materials Chemistry A* article due to concerns with the reliability of the data.

There are repeating fragments in the XRD data in Fig. S2 and S3, and the Raman data in Fig S6, indicating that the data has been manipulated.

The authors are not able to provide their original data.

Given the significance of these concerns, the findings presented in this paper are no longer reliable.

The authors were informed about the retraction of the article but have not responded.
