Expression of concern for 'Low energy loss (0.42 eV) and efficiency over 15% enabled by non-fullerene acceptors containing *N*-bis(trifluoromethyl)phenylbenzotriazole as the core in binary solar cells' by María Privado *et al.*, *J. Mater. Chem. C*, 2022, **10**, 13174–13182, <https://doi.org/10.1039/D2TC02289C>.

Journal of Materials Chemistry C is publishing this expression of concern in order to alert readers about concerns with the TEM images of P1:TOCR1 and P1:TOCR2 films in Fig. 6. An expression of concern will continue to be associated with the article until we receive conclusive evidence regarding the reliability of the reported data.
