

Showcasing research from Dr PrechtI, Instituto Superior Técnico, Lisbon, Portugal and Prof. Deska, University of Helsinki, Finland.

Formaldehyde and its surrogates as a C1 platform for defossilised modern societies

In this tutorial PrechtI and Deska revisit their joint long-term research activities on formaldehyde. The tutorial covers the industrial use of formaldehyde, its role in nature, the developments and perspectives in biomass valorisation, CCUS, materials, organic synthesis and energy storage.
