Expression of concern for 'Simple NMR predictors of catalytic hydrogenation activity for [Rh(cod)Cl(NHC)] complexes featuring fluorinated NHC ligands' by Mohamad Shazwan Shah Jamil *et al.*, *Dalton Trans.*, 2019, **48**, 9317–9327, <https://doi.org/10.1039/C9DT01219B>.

The Royal Society of Chemistry is publishing this expression of concern in order to alert our readers that we are presently unsure of the reliability of the NMR data reported in the ESI.

An expression of concern will continue to be associated with the article until we receive conclusive evidence regarding the reliability of the reported data.
