

Environmental Science: Atmospheres

rsc.li/esatmospheres

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

IN THIS ISSUE

ISSN 2634-3606 CODEN ESANC9 5(10) 1065–1174 (2025)

PAPERS

1071

Effervescent nozzle design to enable outdoor marine cloud brightening experimentation

Luke P. Harrison,* Chris Medcraft and Daniel P. Harrison

1081

Hot and dry conditions elevate grass pollen and sub-pollen particle concentrations in Melbourne, Australia

C. B. A. Mampage, K. M. Emmerson,* E. R. Lampugnani, R. Schofield and E. A. Stone*

**GOLD
OPEN
ACCESS**

EES Solar

**Exceptional research on solar
energy and photovoltaics**

Part of the EES family

rsc.li/EESolar

1099

Multiphase reaction of nitrate radicals with vanillic acid aerosols: kinetics and formation of light-absorbing particles

Laura-Helena Rivellini,^{*} Carolyn Liu-Kang and Jonathan P. D. Abbatt^{*}

1110

Size-resolved cloud droplet acidity over the US

Stylianos Kakavas, Georgios Siderakis and Spyros N. Pandis^{*}

1119

Characterising changes in the methane response of a semiconductor-based metal oxide sensor over time

Adil Shah,^{*} Olivier Laurent, Grégoire Broquet, Clément Romand and Philippe Ciais

This fit does **not** appear to be **influenced** by

- natural passage of time
- power loss
- dry exposure

This fit appears to be **temporarily influenced** by

- water mole fraction

This fit appears to be **permanently influenced** by

- exposure to certain gases (such as hydrogen sulphide)

1144

An unsupervised machine learning approach for indoor air pollution analysis

Bárbara A. Macías-Hernández,^{*} Edgar Tello-Leal,^{*} Jailene Marlen Jaramillo-Perez and René Ventura-Houle

Airborne cloud water pH measurements in diverse regions: statistics and relationships with constituents

Kayla M. Preisler, Ewan C. Crosbie, Miguel Ricardo A. Hilario, Grace Betito, Rachel A. Braun, Andrea F. Corral, Eva-Lou Edwards, Alexander B. MacDonald, Ali Hossein Mardi, Michael A. Shook, Connor Stahl, Edward L. Winstead, Kira Zeider, Luke D. Ziemba and Armin Sorooshian*
