Correction for 'Arylselanyl motifs in hierarchically structured mesoporous phenolic polymers: efficient adsorption sites for Hg<sup>2+</sup> ions' by Vishnu Selladurai et al., Mater. Adv., 2024, https://doi.org/10.1039/ d4ma00899e

The authors regret that the units of adsorption capacity were incorrectly reported in the abstract & the 9th page of the original

Within the abstract of the article, in the sentence beginning "The maximum Hg2+ ion uptake capacities..." the units should be listed as  $mg g^{-1}$ .

On the 9th page of the article, within section 3.8, in the sentence beginning "As shown in Table 2,..." the units should read mg  $g^{-1}$ . The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
