Correction: Arylselanyl motifs in hierarchically structured mesoporous phenolic polymers: efficient adsorption sites for Hg²⁺ ions

Vishnu Selladurai and Selvakumar Karuthapandi*

Correction for 'Arylselanyl motifs in hierarchically structured mesoporous phenolic polymers: efficient adsorption sites for Hg²⁺ ions' by Vishnu Selladurai et al., *Mater. Adv.*, 2024, <https://doi.org/10.1039/d4ma00899e>.

The authors regret that the units of adsorption capacity were incorrectly reported in the abstract & the 9th page of the original article.

Within the abstract of the article, in the sentence beginning "The maximum Hg²⁺ ion uptake capacities. . ." the units should be listed as mg g⁻¹.

On the 9th page of the article, within section 3.8, in the sentence beginning "As shown in Table 2, . . ." the units should read mg g⁻¹. The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
